NITHIN KUMAR PASAM

Software Development Engineer | DevOps | Cloud Infrastructure | CI/CD Automation

Atlanta, GA | pasamnithin@gmail.com | +1 (505)-410-1598 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Development Engineer with 3+ years of experience in **DevOps** and backend engineering, specializing in developing scalable, fault-tolerant systems on AWS using **Java, Spring Boot, EC2, Lambda, API Gateway, SQS,** and **SNS.** Streamlined 20+ **CI/CD pipelines** with **Jenkins** and **GitHub** Actions, boosting deployment speed by 40%. Led migration of 20+ applications to serverless architecture, cutting infrastructure costs by 35%. Provisioned infrastructure using **Terraform** and **AWS CDK** across multiple environments. Enhanced monitoring with CloudWatch and Splunk, reducing incident response times by 30%. Delivered robust solutions across the **SDLC** within **Agile/Scrum** frameworks and engineered internal DevOps platforms to accelerate delivery cycles by 50%.

TECHNICAL PROFICIENCIES

- **Languages:** Java, Python, Bash, TypeScript, JavaScript, Shell Scripting, PowerShell
- **Cloud Service:** AWS, Microsoft Azure, GCP
- **Frameworks**: Spring Boot, Spring Security, Hibernate, React.js
- **Tools & Technologies:** Terraform, Ansible, Chef, Jenkins, GitHub Actions, Maven, Nexus, Sonar, Docker, Kubernetes, OpenShift, Git, SVN, Bitbucket, GitHub, GitLab, ELK, Splunk, Prometheus, Grafana, AppDynamics, Selenium
- **Databases:** MySQL, RDS, Amazon Aurora
- **Web Servers:** Tomcat, Apache HTTPD, Nginx
- **Operating Systems:** Linux (Ubuntu), Windows
- **Bug and Ticket Tracking Tools:** Azure, JIRA

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS), Hyderabad, India

DevOps Engineer — Dec 2021 – July 2023

- Built and maintained over 50+ **CI/CD pipelines** using **Jenkins**, **Git**, and **Docker**, enabling automated builds and deployments across microservices and reducing release times by 40%.
- Provisioned cloud infrastructure via Terraform and AWS CDK, enabling QA self-service environments and cutting setup time by 60%.
- Forged highly scalable microservices using **Java, Spring Boot,** and event-driven architecture; bolstered system throughput by 30% and reduced message processing time through Kafka and AWS SQS integrations.
- Managed production workloads on **AWS** (EC2, RDS, VPC, ELB, Route 53), with integrated monitoring and alerting via **CloudWatch** and **Splunk**, improving incident detection and resolution.
- Spearheaded **on-call rotations**, expertly diagnosing and resolving 95% of high-priority incidents within defined SLAs that enhanced system uptime and improved developer response efficiency by 30%.
- **Developed internal self-service deployment frameworks, reducing manual interventions by 40% and improving CI reliability.**
- **Partnered with development, QA, and operations teams** to optimize service performance and automate delivery pipelines, achieving a **30% increase in deployment frequency** and aligning with **Agile sprints**.

XchangeTechs Star Alliance LLP, Bengaluru, India

DevOps & Automation Engineer — June 2020 – Nov 2021

- Implemented Maven-based automation scripts **for Java/Spring Boot** deployments, minimizing manual tasks by **60%** and reducing build failures by **30%**.
- Ensured on-time delivery by aligning release cycles with **Agile/Scrum sprints**, leading to **15+ successful project releases**.
- Constructed real-time deployment dashboards using **Node.js** and WebSocket to increase visibility into pipeline performance, decreasing issue identification time by **40%**.
- Containerized **25+ applications** using Docker and deployed via Kubernetes, achieving a **99.9% release success rate** across environments.
- Integrated **SonarQube, Nexus,** and **JUnit** into workflows to enforce code quality, boost test coverage by **35%**, and reduce regression bugs by **20%**.
- Configured system monitoring and alerts using **CloudWatch**, **Prometheus**, and **Grafana**, reducing MTTR by **45%** and improving uptime.
- Optimized hybrid cloud deployments by tuning **Apache HTTP Server** and **Nginx**, lowering infrastructure costs by **25%**.
- Scripted automation for system health checks and log rotation using Bash and Python, minimizing downtime incidents by **30%**.
- Collaborated with Dev, QA, and Ops in Agile environments to implement DevOps best practices, improving deployment consistency by **50%**.

EDUCATION

Webster University, St. Louis, MO

Master's in Information Technology Management (**GPA:** 3.8/4.0) — Aug 2023 – May 2025

CERTIFICATIONS

AWS Certified Solutions Architect Associate
